

Descriptive Stats

Exercise

The plot below was generated using measurements from a sample of 344 penguins. How do we feel about the following statement:

Based on our data, we can conclude that Chinstrap penguins have longer bills on average than Adelie penguins.

a) Strongly Agree

b) Agree

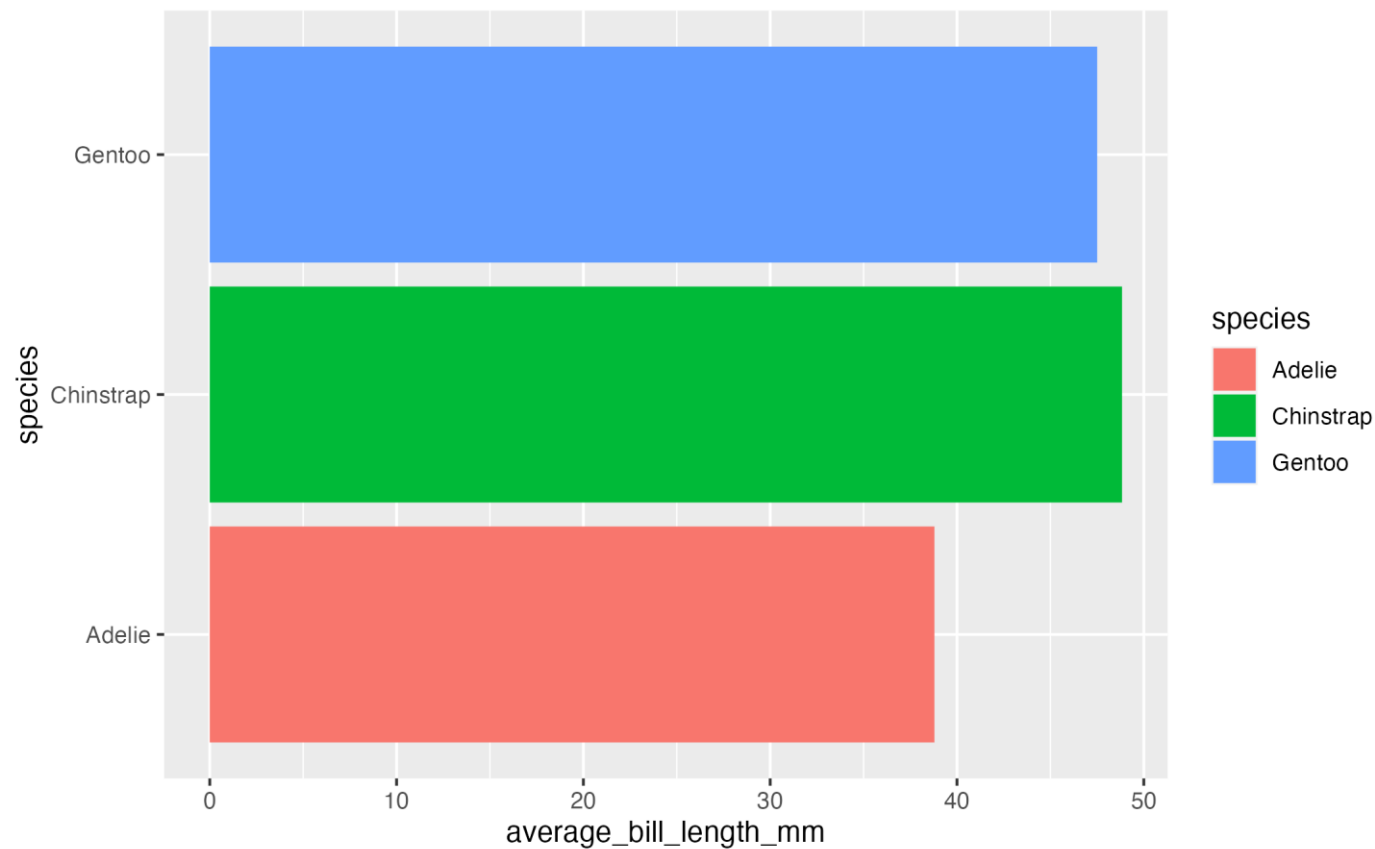

c) Neutral

d) Disagree

e) Strongly Disagree

Based on our data, we can conclude that Chinstrap penguins have longer bills on average than Adelie penguins.

In our sample of 344 penguins, Chinstrap penguins have longer bills on average than Adelie penguins.

Descriptive Statistics describes your sample.
It does NOT generate conclusions about underlying phenomenon.
