

Describing Continuous Variables

Demo

Create a histogram.

If a histogram shows a normal distribution (bell-shaped curve), calculate the **mean** and **standard deviation**.

Otherwise, calculate the **five-number summary**.

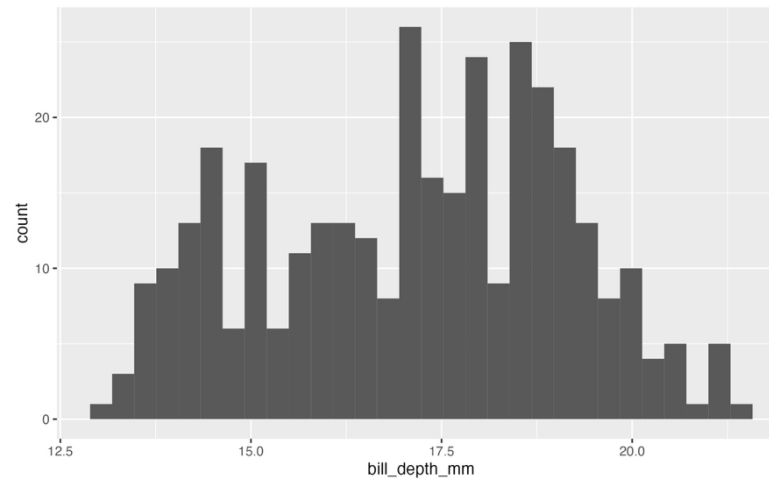

Knowledge Check

Describing Continuous Variables

True or False:

You should calculate the mean and standard deviation for the plot below.

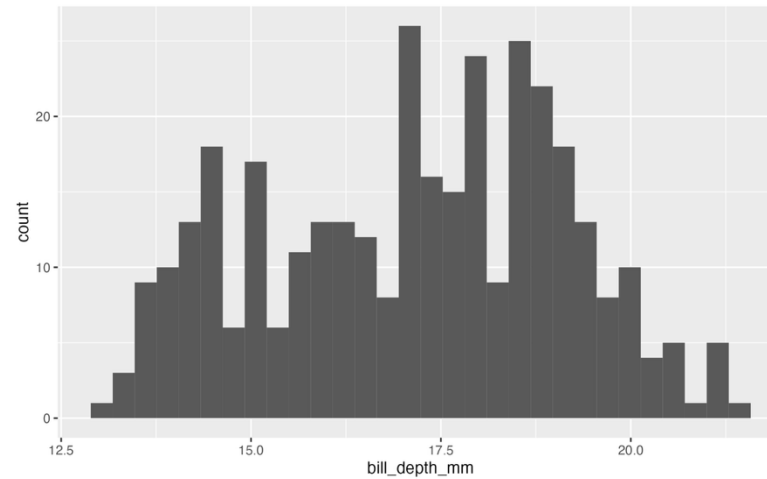

Knowledge Check

Describing Continuous Variables

True or False:

You should calculate the mean and standard deviation for the plot below.

You should calculate the five number summary.
