

The Tidyverse

What is the Tidyverse?

The Tidyverse is a set of tools that...

“facilitate a conversation between a human and a computer about data.”

Base R Approach

```
student_df[  
  student_df$final_grade >= 90,  
  "full_name"  
]
```

Tidyverse Approach

```
student_df %>%  
  filter(final_grade >= 90) %>%  
  select(full_name)
```

**Tidyverse provides a way for you align
your code with your description of your
analysis.**

Knowledge Check

The Tidyverse

Which code block below uses the Tidyverse approach?

a)

```
prescriptions_df <- prescriptions_df[  
  prescriptions_df$RXDUSE == 1,  
  c("SEQN", "RXDDRUG")  
]
```

b)

```
prescriptions_df <- prescriptions_df %>%  
  filter(RXDUSE == 1) %>%  
  select(SEQN, RXDDRUG)
```

Knowledge Check

The Tidyverse

Which code block below uses the Tidyverse approach?

a)

```
prescriptions_df <- prescriptions_df[  
  prescriptions_df$RXDUSE == 1,  
  c("SEQN", "RXDDRUG")  
]
```

b)

```
prescriptions_df <- prescriptions_df %>%  
  filter(RXDUSE == 1) %>%  
  select(SEQN, RXDDRUG)
```
