

Loops

Exercise

Introducing Loops

Take a look at the code to the right.

What is the value of x?

- a. 6
- b. 7
- c. 8
- d. Something else

```
x <- 1

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}
```

Exercise

Introducing Loops

Take a look at the code to the right.

What is the value of x?

- a. 6
- b. 7**
- c. 8
- d. Something else

```
x <- 1

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}
```

That was annoying!
There must be a better way...

```
x <- 1

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}

if (x < 7){
  x <- x + 1
}
```

Loops

Express code that repeats!

While Loop

```
x <- 1  
  
while (x < 7){  
  x <- x + 1  
}
```

Loops

Express code that repeats!

For Loop

```
for (int_value in 1:7){  
  x <- int_value  
}
```

Demo

Loops

In this demo, we will:

Create while and for loops
