

Inferential Stats

Exercise

The plot below was generated using measurements from a sample of 344 penguins. How do we feel about the following statement:

Based on our data, we can conclude that Chinstrap penguins have longer bills on average than Adelie penguins.

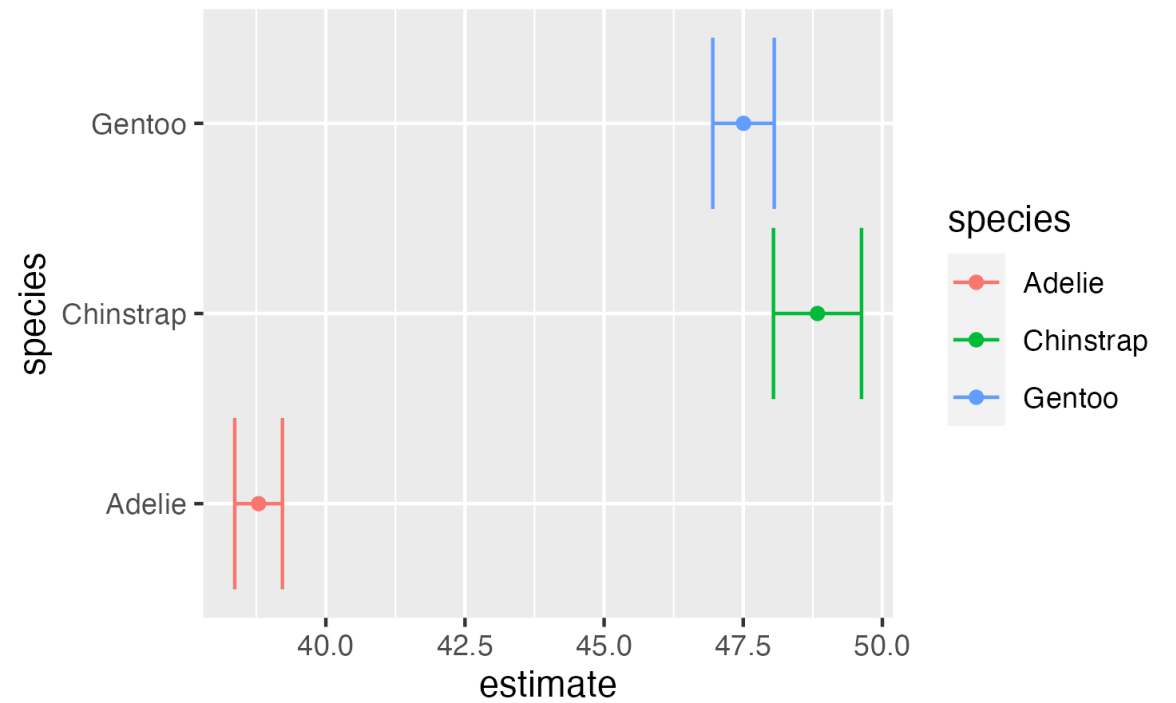

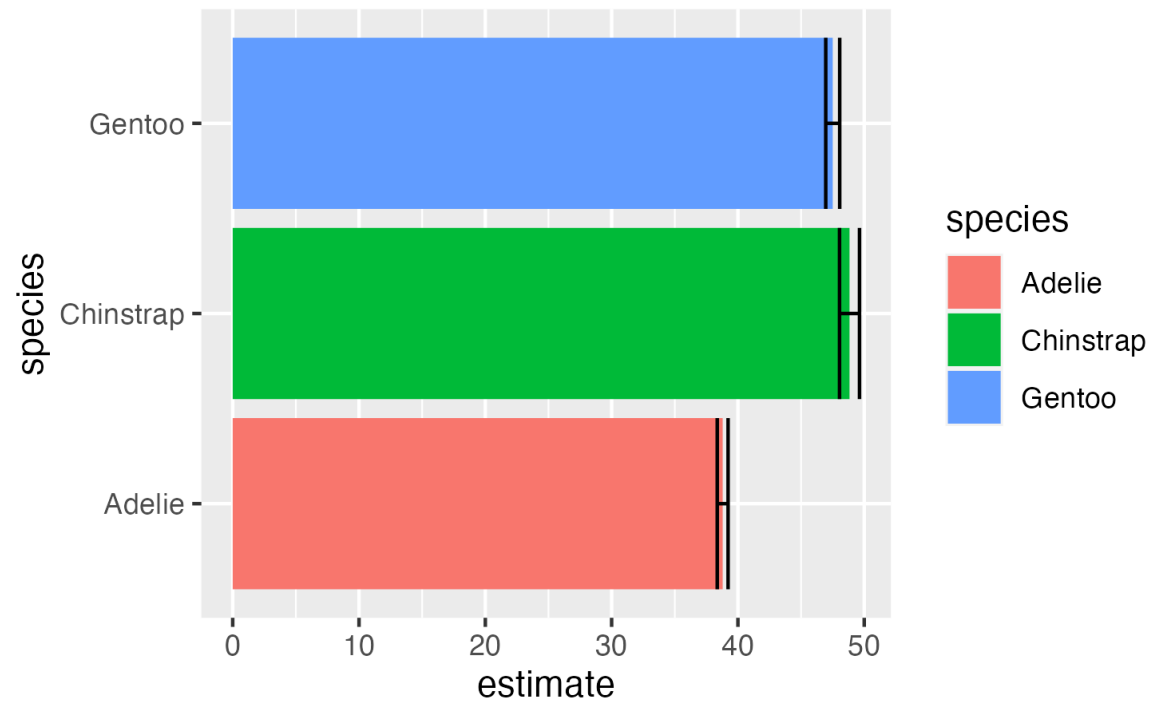

a) Strongly Agree
b) Agree

c) Neutral

d) Disagree

e) Strongly Disagree

There is some uncertainty around the **true** average bill lengths of Chinstrap penguins and Adelie penguins.

Inferential Statistics

Inferring information about a population or underlying mechanism based on a sample.

Describing ~~sample~~ **population** statistics:

- Point Estimate
- Standard Error
- Confidence Interval
