Logistic Regression Overview

Linear Regression

- Predict the **dependent** variable based on **independent** variables.
- Describe the relationship between **dependent** and **independent variables**.

Logistic Regression

- Predict the **dependent** variable based on **independent** variables.
- Describe the relationship between **dependent** and **independent variables**.

Regression

- Predict the **dependent** variable based on **independent** variables.
- Describe the relationship between **dependent** and **independent variables**.

**Linear
Regression**
Dependent
variable is
continuous.

**Logistic
Regression**
Dependent
variable is **binary**.
