

Survival Analysis Overview

Survival Analysis

Study time until an **event** (e.g. death) occurs.

Methods

- Kaplan Meier Curve (Descriptive)
- Log Rank Test (Hypothesis Test)
- Cox Proportion Hazards Regression (Regression)

Data Format

- Time to Event (or Censor)
- Status
 - **Censored**: Event has not happened
 - Event happened by end of the study

Survival Analysis takes censored data into account.

Demo

Health and Retirement Study (hrs)
dataset

Knowledge Check

True or False:

We must remove all censored data before beginning survival analysis.
