

Point Estimate

Point Estimate

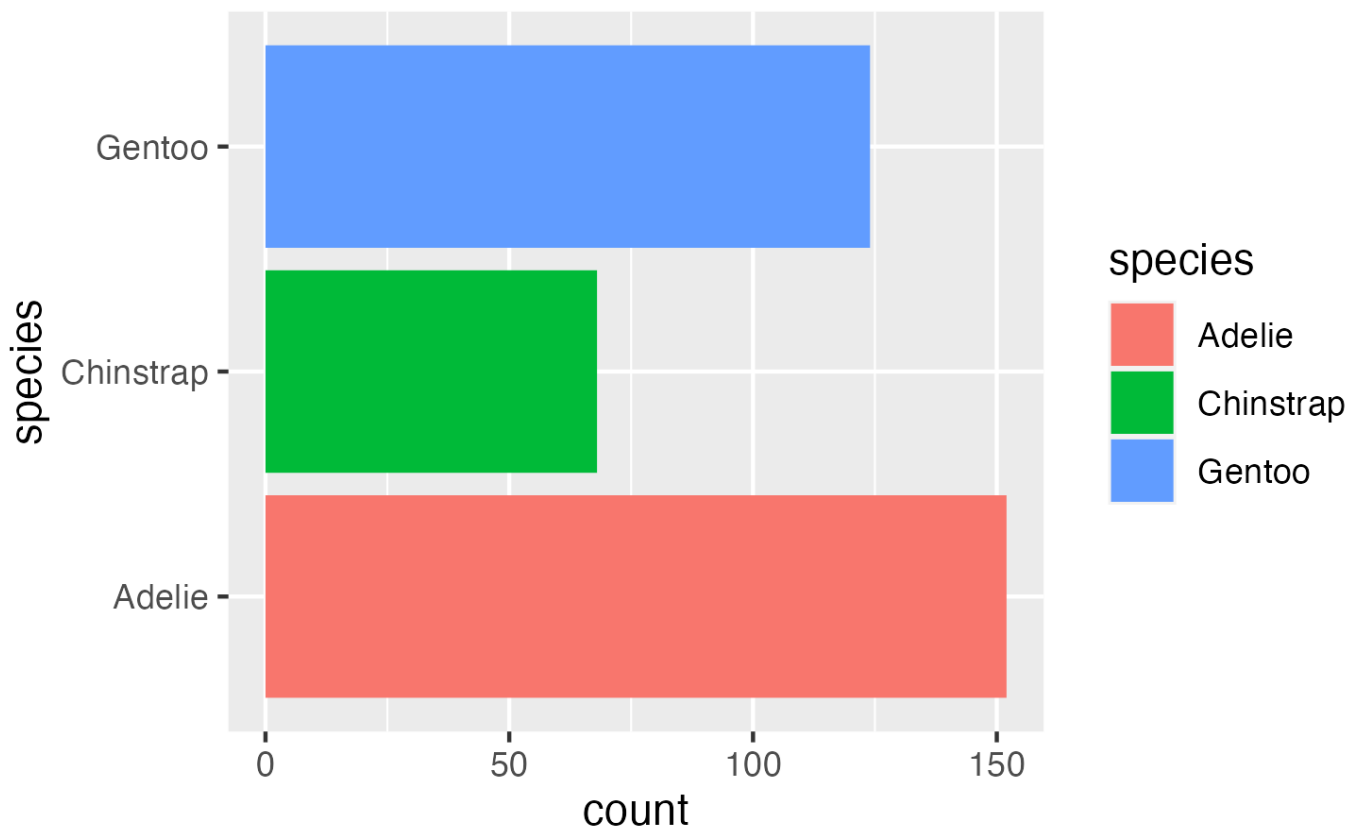

A single value calculated from a sample that is used to estimate a population parameter.

The **sample statistic** serves as the point estimate of the **population parameter**.

Exercise

How do we feel about the following statement:

We can use the proportion of each penguin species in our sample as point estimates for the proportion of each penguin species in the wild.

a) **Strongly Agree**

b) **Agree**

c) **Neutral**

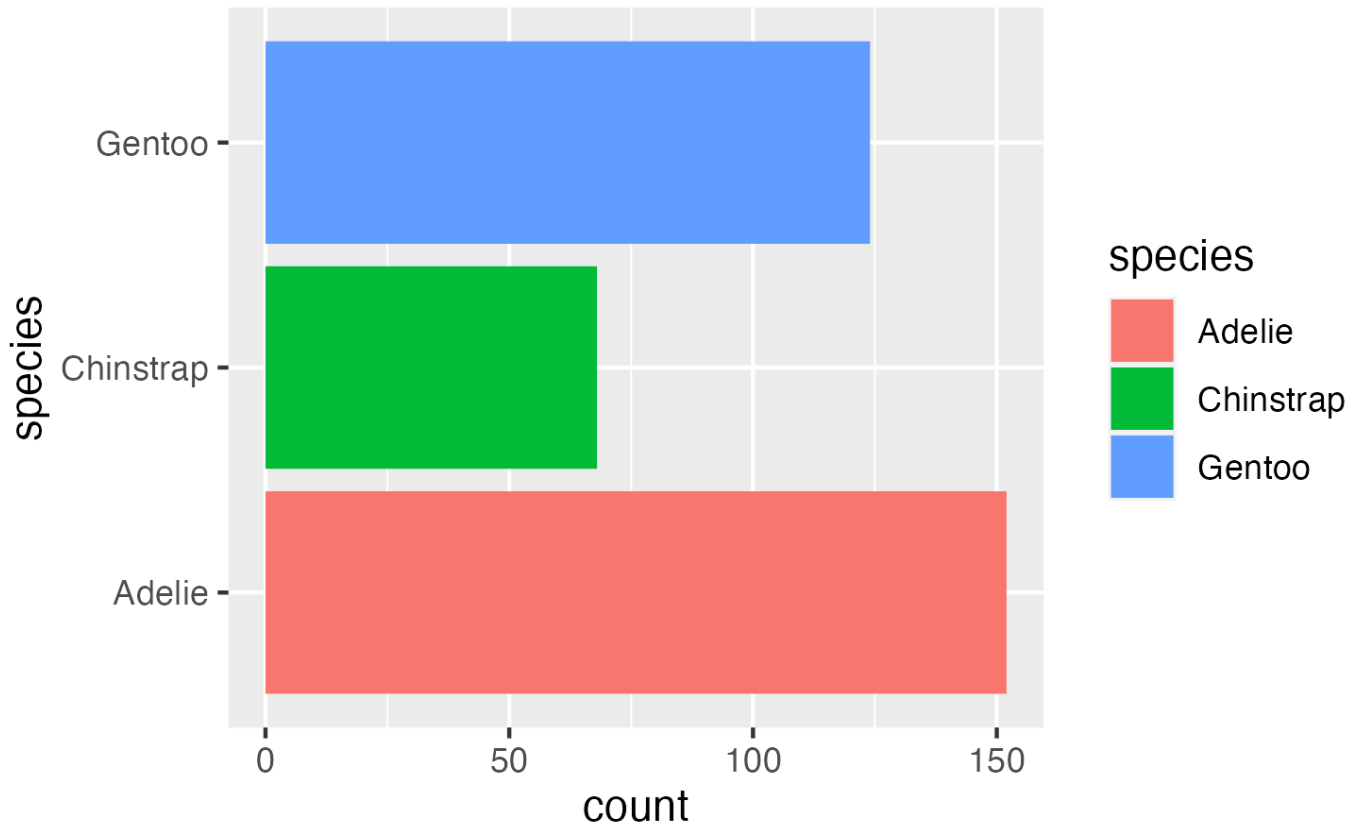

d) **Disagree**

e) **Strongly Disagree**

Exercise

How do we feel about the following statement:

We can use the proportion of each penguin species in our sample as point estimates for the proportion of each penguin species in the wild.

a) **Strongly Agree**

b) **Agree**

c) **Neutral**

d) **Disagree**

e) **Strongly Disagree**

It depends on how the sample was collected. If not representative, the estimate may be biased.
